

ENVIRONMENT POLICY

Purpose

Atlas commits to responsible and efficient environmental management and performance.

Policy Statement

Atlas commits to:

- Compliance with applicable environmental legislation and other regulatory requirements through our Environmental Management System.
- Committed to increased knowledge and understanding of biodiversity values across our operations through baseline assessments and environmental management for protection of biodiversity.
- Continual improvement in environmental management through innovation, technology, and long-term planning.
- Work proactively and collaboratively with all contractors to ensure Atlas' environmental legal and other requirements are visible and managed in their processes.
- Foster environmental awareness in our employees and contractors through environmental inductions, training, and awareness programs.
- To identify, assess and mitigate environmental risks across all phases of our operations and ensure operations are conducted in an environmentally sustainable manner.
- Execution of rehabilitation commitments outlined within approved mine closure plans.
- Promote efficient use of natural resources, minimising waste and investigating cleaner energy options across our operations.
